## LUXURY RETAIL STORE, INVENTORY & STOCK OPERATIONS MANAGER

Las Vegas, Nevada | 650-248-9346 | blairpagedrakemccoy@gmail.com | Portfolio | LinkedIn | GitHub | Upwork

### PROFESSIONAL SUMMARY

Retail operations, inventory, and stock management professional with 15+ years of experience spanning retail sales floor operations, backroom/stockroom management, e-commerce fulfillment, supply chain coordination, distributor and vendor relations, and cross-functional team leadership. Background includes hands-on retail inventory control, SKU tracking, shipment receiving and processing, cycle counts, loss prevention, visual merchandising, and POS operations, combined with 10+ years of hands-on Magento and WooCommerce e-commerce platform experience — managing product catalogs, SKU-level inventory data, order fulfillment, warehouse and logistics coordination, and vendor/distributor integrations for national and enterprise retail brands including Kate Spade. Proven ability to reduce shrinkage, improve stock accuracy, streamline procurement, and drive operational efficiency in fast-paced, customer-facing retail environments. Seeking to bring this cross-trained retail operations, inventory management, and store leadership expertise to a luxury retail store, inventory, or stock management role on the Las Vegas Strip.

### CORE COMPETENCIES

Inventory & Stock Management • Retail Store Operations • Stockroom & Backroom Management • Cycle Counts & Physical Inventory • SKU Tracking & Product Catalog Management • Magento & WooCommerce E-Commerce Platforms • Shipment Receiving & Processing • Loss Prevention & Shrinkage Reduction • Vendor & Distributor Relations • Supply Chain & Procurement Coordination • Order Fulfillment & Logistics • Visual Merchandising & Floor Presentation • POS Operations & Cash Handling • Customer Experience & Client Relations • Team Leadership, Training & Mentoring • Cross-Functional Collaboration • Process Improvement • Scheduling & Staff Coordination • Sales Support & Upselling • KPI & Performance Reporting • Warehouse & Distribution Operations • High-Volume / Seasonal Peak Operations • Data-Driven Decision Making • Luxury Brand & High-Touch Client Service

### PROFESSIONAL EXPERIENCE

Retail Sales Associate — Inventory, Stock & Visual Merchandising 2006 – 2007

*Hot Topic · Lansing, Michigan · Part-Time Retail*

Assisted with inventory organization, stock replenishment, shipment receiving and processing, and SKU tracking in a fast-paced retail environment, ensuring accurate floor presentation and product availability during high-traffic and seasonal peak periods.

Maintained visual merchandising standards across featured displays, promotional product walls, and branded lifestyle collections, contributing to an engaging in-store customer experience consistent with brand presentation standards.

Supported point-of-sale (POS) operations including cash handling, customer checkout, returns, exchanges, and transactional accuracy while maintaining strong customer satisfaction and loss-prevention standards.

Delivered high-energy, consultative customer engagement and product knowledge across multiple merchandise categories, improving upsell opportunities and personalized recommendations.

**Promotions Specialist & Parts Counter — Inventory & Retail Operations 1997 – Present**

*Family-Owned Retail & Motorsports Business · Michigan*

Coordinated supplier and distributor orders (including Parts Unlimited and niche re-manufacturers), streamlining procurement, restocking cadence, and vendor communication for a retail parts counter.

Maintained accurate inventory records and supported daily retail floor and stockroom operations, ensuring stock accuracy, product availability, and service continuity for walk-in and event customers.

Directed logistics, equipment staging, and inventory prep for 5+ major motorsports events, achieving 100% readiness on event days through proactive planning and stock control.

Resolved approximately 95% of part-related customer issues on first contact through strong product knowledge, distributor relationships, and hands-on inventory expertise.

**Full Stack AWS/OpenStack Hybrid Cloud Data Ops Engineer Apr 2026 – Present**

*Upwork · Freelance · Remote (Las Vegas, NV)*

Manage e-commerce product data, inventory, and order-fulfillment systems for high-volume retail and e-commerce clients, ensuring accuracy and reliability of catalog, stock, and transaction data.

Architect and maintain AWS-based storage and logistics infrastructure (S3, RDS, Lambda) supporting retail operations where inventory accuracy, uptime, and fulfillment speed directly impact revenue.

Coordinate with distributed, cross-functional teams to prioritize operational fixes and process improvements, applying the same organizational discipline required for stockroom and store-level inventory control.

**Product Manager — E-Commerce & Digital Storefront Operations 1997 – Present**

*Shock Therapy Rebuilding · Seasonal · Remote*

---

Lead product roadmap, catalog, and storefront operations for a digital commerce platform, overseeing product presentation, promotional merchandising, and customer-facing sales experience.

Manage cross-functional coordination among design, sales, and operations stakeholders, mirroring the collaboration required between sales floor, stockroom, and management teams in retail store settings.

Drive process improvements and conversion-focused merchandising strategy, contributing to a documented ~57% revenue increase through optimized product presentation and promotional campaigns (see WordPress Developer role below).

### **WordPress Developer & Digital Branding Specialist — Retail Web & Merchandising 1997 – Present**

*Family-Owned Business · Michigan*

Architected and maintained the company's e-commerce and marketing site, improving product presentation, mobile responsiveness, and customer-facing information architecture.

Maintained 99.9% platform uptime SLA over multiple years with zero service interruptions through proactive monitoring and contingency planning — the same reliability discipline applied to inventory and stock accuracy.

Contributed to an approximate 57% revenue increase through targeted merchandising strategy, optimized customer flows, and promotional campaigns.

### **L3 Linux Managed Applications & Hosting Support Engineer 2021 – 2025**

*Liquid Web · Nexcess CloudSites · Remote*

Delivered SLA-driven operational support for e-commerce and retail platform customers (including Kate Spade and GameCrazy), maintaining uptime and reliability standards for customer-facing storefront and order systems.

Deployed, secured, and optimized WordPress, WooCommerce, Magento, and Django storefronts, managing product catalog structure, SKU data integrity, and order-fulfillment workflows for high-volume retail operations.

Tuned storefront and database performance (Redis, Varnish, Elasticsearch) to keep product catalog and inventory pages fast and available during peak shopping traffic.

Applied structured, KPI-driven monitoring and incident response processes directly transferable to retail loss-prevention, stock-accuracy auditing, and operational reporting.

### **Technical Support Engineer (IaaS) — Retail & E-Commerce Hosting 2019 – 2020**

*UpCloud · Remote*

Supported Linux and Windows infrastructure for e-commerce and retail hosting customers, contributing to 99.999% uptime for storefront, catalog, and checkout systems through proactive administration and incident response.

Managed MySQL, MariaDB, Percona Server, and MongoDB environments powering product catalog and order/inventory databases, performing tuning, query optimization, and replication management to protect SKU and transaction data.

Supported WordPress/WooCommerce storefront deployments and cPanel/Plesk/Virtualmin hosting environments, maintaining 80–100% weekly customer satisfaction through reliable, retail-focused technical support.

### **AWS Full Stack Developer · Desktop Support · Graphic Design & Promotions Jul 2018 – Nov 2018**

*National Specialties LLC · Contract · Hybrid (Saginaw, MI / Seattle–Tacoma–Lakewood, WA)*

Developed and tuned a WooCommerce storefront (Redis, Nginx, MySQL/RDS, PHP-FPM, Zend OpCache) to improve product catalog load speed, checkout stability, and inventory-page performance.

Integrated distributor systems (SanMar, Rothco) via drop-shipping workflows and SOAP APIs, automating SKU-level inventory updates, product data sync, and order fulfillment across supplier networks.

Migrated 23+ domains and built ~50 cloud storage buckets to support product, inventory, and fulfillment data, reducing storage costs through lifecycle and tiering policies.

Configured a support-ticket routing environment to streamline vendor and customer communication, reducing response times for order and inventory inquiries.

### **Associate DBA / Technical Services Engineer — E-Commerce & Transaction Data Systems 2016**

*Percona · Remote*

Provided production-level database administration (MySQL, MariaDB, Percona Server, MongoDB) for enterprise clients' high-transaction consumer and e-commerce platforms (RDS, MySQL Master HA, Percona XtraDB Cluster), safeguarding product, order, and inventory-record integrity at scale.

Responded to critical incidents via on-call rotation for customers including Fitbit, Vimeo, and Airbnb, resolving high-severity alerts affecting catalog, checkout, and transaction systems and reducing mean time to resolution.

Ensured backup continuity and zero data-loss for product and transaction databases using Percona XtraBackup and mydumper, applying disciplined data-integrity practices directly transferable to SKU and stock-record accuracy.

### **AWS Magento E-Commerce Full Stack Developer — Product Catalog & Inventory Systems 2015 – 2016**

---

*craftartedu.com · Contract · Remote (Tacoma, WA)*

Managed a hybrid Magento v1 e-commerce platform integrated with a custom inventory/order application, maintaining product catalog structure, SKU data, and order-fulfillment accuracy across a hybrid Linux/Windows environment.

Administered AWS infrastructure supporting the storefront and inventory systems, delivering performance and cost optimization for catalog and checkout operations.

Prepared and executed the Magento v1-to-v2 upgrade path while maintaining 100% platform uptime during optimization work, preserving continuous product and inventory availability.

#### **AWS WooCommerce/WordPress Full Stack Developer — E-Commerce Storefront & Fulfillment 2014 – 2016**

*SydneyKrey · Contract · Remote (Tacoma, WA)*

Built and maintained a high-availability WooCommerce/WordPress storefront on AWS (EC2, S3, Route 53, RDS), supporting product catalog, SKU management, and transactional reliability for scaling retail sales.

Configured Redis/Memcached caching and CloudFront CDN, and tuned Nginx/Apache with PHP-FPM for high-performance product-page and checkout traffic.

Implemented Elastic Load Balancing and Auto Scaling for seasonal spikes and flash sales, sustaining 99.99% uptime for inventory and order-fulfillment systems during peak demand.

#### **Linux Administrator / Cloud Ops / Infrastructure — E-Commerce Hosting 2014 – 2016**

*Rackspace Technology · Full-time · Hybrid (San Antonio, TX)*

Provided 24/7 international support for e-commerce clients, managing ticketing and phone support to SLA for storefront, catalog, and order-fulfillment systems.

Administered Magento, WordPress, Drupal, and Joomla e-commerce platforms across LAMP/LEMP stacks (RHEL, CentOS, Ubuntu), ensuring product catalog, SKU, and inventory-database reliability, patching, and performance tuning.

Managed MariaDB, MySQL, and clustered database environments (replication, failover, backups, query optimization) protecting product and inventory data for high-availability retail hosting.

Monitored storefront systems and applications (Nagios, ELK stack), triaging alerts and resolving performance issues proactively to keep product and inventory pages available for customers.

### **EDUCATION**

Bachelor of Science, Business — University of the People

**2025 – 2026 (117/120 credits completed, expected 2026) · 3.22 GPA, Honors List · Computer Science/E-Commerce, Programming & Database electives**

MBA, AI Product Management (In Progress) — Institute of AI & Technology (Udacity × Accenture)

**March 2026 – Present · Inaugural cohort with Accenture; ~60% complete**

### **CERTIFICATIONS**

AWS Certified Cloud Practitioner — Active

**AWS Certified Solutions Architect – Associate — Exp. Jan 2026**

Cloud Tech Associate, Advanced Disaster Recovery — Credential ID: C240499

Certified Linux Administrator (LPIC-1) — Credential ID: LPI-101 997303855

Red Hat Certified System Administrator (RHCSA) / Red Hat Certified Engineer (RHCE) — Credential ID: 140-075-227
