

Blair Page

Las Vegas, Nevada | 650-248-9346 | blairpagedrakemccoy@gmail.com | LinkedIn | Portfolio | GitHub | Upwork

E-commerce and product-management professional with 15+ years spanning digital commerce, marketplace and web operations, product delivery, systems engineering, cloud infrastructure, data operations, and UX. Experienced translating business requirements into scalable commerce platforms, improving customer-facing digital experiences, coordinating cross-functional delivery, and aligning technology, operations, analytics, and product priorities. Hands-on background with Shopify, WordPress/WooCommerce, AWS, OpenStack, MongoDB, PostgreSQL, PHP, Python, JavaScript, API integrations, automation, and performance optimization.

CORE TECHNICAL SKILLS

- E-COMMERCE & DIGITAL COMMERCE: E-commerce platforms, Shopify, WooCommerce, WordPress, online storefronts, product catalogs, customer experience, conversion optimization, marketplace operations, web operations, digital product delivery
- PRODUCT & PROGRAM MANAGEMENT: Product strategy, product lifecycle, roadmap planning, requirements analysis, stakeholder management, cross-functional delivery, process improvement, Agile delivery, UX collaboration, analytics-driven decision making
- TECHNOLOGY & DATA: AWS, OpenStack, cloud infrastructure, data operations, PostgreSQL, MongoDB, MySQL, Redis, APIs, Python, PHP, JavaScript, automation, performance optimization, Linux, CI/CD
- Security Hardening & Compliance: Firewall management, server hardening, PCI-DSS and OWASP best practices
- Networking & DNS: TCP/IP diagnostics (MTR, traceroute), DNS administration, SSL/TLS troubleshooting
- Web Servers: Apache, Nginx, PHP-FPM performance tuning
- Databases: MariaDB, MySQL, PostgreSQL, Percona XtraDB Cluster, Galera, MongoDB, ProxySQL, HAProxy
- Performance & Caching: Full-stack tuning across web, cache (Redis, Varnish, Memcached), database, and CDN (CloudFront) layers
- Incident Response & Observability: On-call/PagerDuty, root-cause analysis, Nagios, ELK stack, Percona Monitoring & Management
- Deployment Automation & CI/CD: Ansible, Terraform, Puppet, Docker, Kubernetes, GitLab CI/CD, WP-CLI
- Release Management & Documentation: Runbooks, knowledge-base articles, change control, operational documentation
- Capacity Planning & Business Continuity: Backup strategy, disaster recovery (Percona XtraBackup, mysdumper, AWS Snowball)
- Scripting & Languages: Bash, Python, PHP; working familiarity with Node.js/TypeScript
- Hosting Control Panels: cPanel/WHM, Plesk, InterWorx, Virtualmin

EXPERIENCE

Full Stack AWS/OpenStack Hybrid Cloud Data Ops Engineer

Apr 2026 - Present

Upwork, Remote (Las Vegas, NV)

Freelance

- Provide freelance database administration, AWS cloud engineering, and e-commerce full-stack development for high-performance production systems where scalability, uptime, and reliability directly impact revenue.
- Optimize database performance across MySQL, MariaDB, PostgreSQL, and MongoDB, plus AWS-managed services (RDS, DynamoDB, Redshift), covering query tuning, indexing, and resolution of high-CPU, locking, and concurrency issues.
- Design high-availability database architectures using replication, clustering, Percona XtraDB Cluster, Galera, and failover strategies to improve resilience and fault tolerance.
- Configure ProxySQL and HAProxy for load balancing, read/write splitting, and scalable database connectivity in production.
- Implement caching strategies with Redis, Memcached, AWS ElastiCache, and CloudFront CDN to reduce

latency across application, database, cache, and edge layers.

- Architect and scale AWS infrastructure (EC2, RDS, DynamoDB, S3, CloudFront, Lambda) with a focus on performance, cost, and longterm maintainability.

Product Manager - Front-End Modernization & Rider Engagement

1997 - Present

Shock Therapy Rebuilding, Remote

Seasonal

- Lead the strategic modernization and phased rebuild of the company's digital platform, transitioning legacy WordPress infrastructure toward a lean, scalable, front-end-driven architecture.
- Manage product roadmap planning, agile iteration, UX/UI prioritization, user research, wireframing, and deployment coordination supporting conversion optimization and mobile-first experiences.
- Drive front-end modernization involving responsive UI, WCAG accessibility, component libraries, SEO, and analytics instrumentation to reduce technical overhead and improve responsiveness.
- Support integrated social media engagement strategy (TikTok, Instagram Reels, YouTube Shorts) to grow organic traffic and community participation.

WordPress Developer & Digital Branding Specialist

1997 - Present

Shock Therapy Rebuilding, Remote

Seasonal

- Architected and maintain the company WordPress site, improving mobile responsiveness, UX, and information architecture across devices.
- Maintained 99.9% uptime SLA over multiple years with zero service interruptions through proactive monitoring, backups, and contingency planning.
- Executed 50+ WordPress core, theme, and plugin updates with attention to security, compatibility, and performance.
- Drove an approximate 57% revenue increase through targeted web strategy, optimized user flows, and promotional campaigns.

Promotions Specialist & Parts Counter

1997 - Present

Shock Therapy Rebuilding, Remote

Seasonal

- Coordinated supplier orders with major distributors (including Parts Unlimited) and niche re-manufacturers, streamlining procurement.
- Maintained inventory records and supported daily retail operations, ensuring stock accuracy and service continuity.
- Directed logistics and equipment prep for 5+ major motorsports events, achieving 100% readiness on race days.
- Resolved approximately 95% of part-related customer issues on first contact through product knowledge and distributor relationships.

Front-End Development & UX Design Intern

Feb 2026 - Mar 2026

Premium Technologies UK, Remote

- Delivered responsive, mobile-first interfaces using HTML5 and CSS3 across all major browsers and devices.
- Integrated real-time RESTful API data (including weather services) to extend application functionality.
- Created high-fidelity wireframes and Figma design systems to accelerate development cycles.
- Improved site performance and reliability through CMS audits and front-end fixes.

L3 Linux Managed Applications & Hosting Support Engineer

2021 - 2025

Liquid Web / Nexcess CloudSites, Remote

- Delivered L3 support for SMB and enterprise Linux hosting and hybrid-cloud customers (including Kate Spade and GameCrazy), resolving complex issues across LAMP/LEMP stacks, OpenStack infrastructure, and hosting control panels (cPanel, Plesk, InterWorx) to SLA-driven uptime targets.

- Deployed, secured, and optimized CMS/e-commerce platforms (WordPress, WooCommerce, Magento, Django) for high-performance production workloads.
- Tuned server and application performance using Redis, Varnish, Elasticsearch, Solr, RabbitMQ, and PHP-FPM process management, reducing page load times.
- Automated backend operations and deployments across Galera, MongoDB, PostgreSQL, Redis, Elasticsearch, HAProxy, WP-CLI, and Cron scheduling for consistent stability at scale.
- Managed MySQL performance, integrity, and security, combined with Cron-based backup strategy and disaster recovery planning, maintaining 24/7 uptime.
- Supported containerized and service-based architectures (Docker-integrated workloads), resolving incidents within SLA thresholds.
- Maintained security compliance across WordPress, Joomla, Drupal, phpBB, and MediaWiki, aligned to PCI-DSS and OWASP best practices.

Technical Support Engineer (IaaS)

2019 - 2020

UpCloud, Remote

- Supported Linux and Windows IaaS platforms, contributing to 99.999% uptime through proactive administration and incident response.
- Worked across distributed systems, virtualization, SDN, and Infrastructure as Code (Terraform, Puppet, Ansible) to improve deployment consistency at scale.
- Managed MySQL, MariaDB, Percona Server, and MongoDB environments, performing tuning, query optimization, and replication management.
- Performed network diagnostics (MTR, traceroute, ping) correlating DNS, port connectivity, and SSL/TLS negotiation to isolate upstream and firewall issues.
- Supported HA configurations, security hardening, TCP/IP networking, and deployment pipelines across cPanel, Plesk, and Virtualmin environments.
- Maintained 80-100% weekly customer satisfaction ratings through clear communication and effective troubleshooting.

AWS Full Stack Developer / Desktop Support / Graphic Design & Promotions

Jul 2018 - Nov 2018

National Specialties LLC, Hybrid (Saginaw, MI / Seattle-Tacoma-Lakewood, WA)

Contract

- Migrated 23+ domains and built ~50 S3 buckets (including static site hosting), reducing cloud storage costs through lifecycle policies and storage tiering.
- Developed and tuned a WooCommerce platform (Redis, Nginx, MySQL/RDS, PHP-FPM, Zend OpCache, CentOS 7) to improve load speed and stability.
- Integrated distributor systems (SanMar, Rothco) via drop-shipping workflows and SOAP APIs to automate inventory and fulfillment.
- Implemented backup/disaster recovery using AWS Snowball to protect production and design assets across workstations and NAS.
- Configured a Virtualmin-based mail environment supporting Zendesk ticket routing and reduced support response times.

Associate DBA / Technical Services Engineer

2016

Percona, Remote

- Provided production-level MySQL, MariaDB, Percona Server, and MongoDB support for enterprise clients (RDS, MySQL Master HA, Percona XtraDB Cluster).
- Responded to critical incidents via PagerDuty on-call for customers including Fitbit, Vimeo, and Airbnb, resolving high-severity alerts and reducing MTTR.
- Diagnosed performance issues across thread counts, CPU utilization, memory, load averages, connections, and disk conditions.
- Ensured backup continuity using Percona XtraBackup and mydumper, achieving zero data-loss incidents.

AWS Magento E-Commerce Full Stack Developer

2015 - 2016

craftartedu.com, Remote (Tacoma, WA)

Contract

- Administered AWS environments and delivered infrastructure optimization for improved performance and cost efficiency.
- Managed a hybrid Magento v1 platform integrated with a custom Java application across Linux and Windows, and prepared the Magento v1-to-v2 upgrade path.
- Maintained 100% uptime during platform optimization and upgrade work.

AWS WooCommerce/WordPress Full Stack Developer

2014 - 2016

SydneyKrey, Remote (Tacoma, WA)

Contract

- Built and maintained a high-availability WooCommerce/WordPress site on AWS (EC2, S3, Route 53, RDS) for scalability and transactional reliability.
- Configured Redis/Memcached caching and CloudFront CDN, and tuned Nginx/Apache with PHP-FPM for high-performance e-commerce traffic.
- Implemented Elastic Load Balancing and Auto Scaling for seasonal spikes and flash sales, sustaining 99.99% uptime.
- Implemented IAM roles, security groups, VPC segmentation, SSL/TLS, and daily backup strategy to secure customer and transaction data.

Linux Administrator / Cloud Ops / Infrastructure

2014 - 2016

Rackspace Technology, Hybrid (San Antonio, TX)

Full-time

- Provided 24/7 international support for e-commerce clients, managing ticketing and phone support to SLA.
- Administered Linux systems (RHEL 6-7, CentOS, Ubuntu) across LAMP/LEMP stacks (WordPress, Magento, Drupal, Joomla), including patching, kernel tuning, and hardening.
- Managed MariaDB, MySQL, Percona XtraDB Cluster, and Galera clusters - replication, failover, backups, and query optimization for high availability.
- Applied DevOps practices with Docker, CoreOS, OpenStack, Ansible, Puppet, Git, and HAProxy to deliver scalable, highly available hosting platforms meeting enterprise SLAs.
- Designed and maintained OpenStack orchestration templates and Heat stacks for VM provisioning and rollback recovery.
- Worked with DRAC/iLO for remote server access and coordinated with DC Ops, SAN, and network teams on hardware-level issues.
- Monitored systems and applications using Nagios and the ELK stack, triaging alerts and resolving performance issues proactively.
- Executed disaster recovery drills and backup verification across Rackspace Cloud, OpenStack, and dedicated environments.

Co-Founder & Full-Stack Developer

2013

String Theory Software Inc., Michigan

Startup

- Co-founded a technology and creative-services startup serving 15+ small-business clients; owned project planning and technical architecture decisions.
- Designed responsive, cross-browser front-end interfaces and company branding.
- Produced a regional TV commercial (The CW) and delivered CMS-based software solutions for media and entertainment clients.
- Implemented back-end functionality in PHP/MySQL to support dynamic content and client portals.

Game Server Administrator & Developer

2005 - 2013

Private Ragnarok Online Servers, Remote

Freelance

- Designed, hosted, and maintained private MMORPG servers, scaling to 300+ concurrent users and achieving 99.9% uptime after infrastructure improvements.
- Developed custom server-side game logic using Lua and C/C++.
- Managed MySQL databases, migrating from MyISAM to InnoDB for improved reliability and transactional integrity.
- Implemented caching, load balancing, and performance monitoring, improving server stability over time.

EDUCATION

MBA, AI Product Management (In Progress)

Mar 2026 - Present

Institute of AI & Technology (Udacity / Accenture)

- Inaugural cohort with Accenture; ~60% complete; ~11.1% of MBA credits granted via RPL exemption for prior dual-enrollment coursework.

Bachelor of Science, Business (In Progress)

2025 - 2026

University of the People

- 3.22 GPA, Honors List (117/120 credits); Computer Science/E-Commerce Developer, Programming & Database electives.

CERTIFICATIONS

- AWS Certified Cloud Practitioner - Active
- AWS Knowledge: Security Champion - Active
- AWS Certified Solutions Architect - Associate - Exp. Jan 2026
- Plesk Linux Expert (Obsidian) - Issued Apr 2025, Expires Apr 2027
- Plesk Obsidian Professional Certification - Issued Sep 2023, Expires Sep 2025 (Credential ID: OBS-2-PRO-EXAM)
- Cloud Tech Associate, Advanced Disaster Recovery - Credential ID: C240499
- cPanel Professional Certification (CPP) - Issued Oct 2023, Expires Sep 2025
- cPanel Certified Partner Accreditation (CPCP) - Issued Oct 2023, Expires Oct 2024
- Imunify360 Certification - Issued Oct 2023, Expires Oct 2024
- cPanel & WHM System Administrator I & II (CWSA-1, CWSA-2) - Issued Oct 2023, Expires Oct 2024
- WHM Administration Certification (CWA) - Issued Oct 2023, Expires Oct 2024
- MongoDB University M102 (DBAs) & M202 (Advanced Deployment & Operations) - Issued 2014/2015
- Certified Linux Administrator (LPIC-1) - Credential ID: LPI-101 997303855
- Red Hat Certified System Administrator (RHCSA) - Credential ID: 140-075-227
- Red Hat Certified Engineer (RHCE) - Credential ID: 140-075-227
