

BLAIR PAGE

SENIOR ENGINEER • DATABASE ADMINISTRATOR • CLOUD DATA OPERATIONS

Las Vegas, Nevada | 650-248-9346 | blairpagedrakemccov@gmail.com

<https://blairyfairy.github.io/BlairPage/> | <https://www.linkedin.com/in/blairpagedrakemccov/> | <https://github.com/Blairyfairy> | <https://upwork.com/freelancers/~016bcaceaa7f29db64>

PROFESSIONAL SUMMARY

Senior Database Administrator and Database Engineer with 15+ years managing production-critical MySQL, MariaDB, PostgreSQL, and MongoDB environments across AWS, OpenStack, and hybrid cloud infrastructure. Specializes in high-availability architecture, replication and clustering (Percona XtraDB Cluster, Galera), query performance tuning, backup and disaster recovery, and 24/7 incident response for enterprise and SMB production systems. Directly supported database operations for recognizable brands including Fitbit, Vimeo, Airbnb, Kate Spade, and GameCrazy, consistently maintaining zero data-loss outcomes and SLA-driven uptime.

CORE TECHNICAL SKILLS

Database Platforms: MySQL, MariaDB, PostgreSQL, MongoDB, Redis, Elasticsearch, SQLite, DynamoDB, Percona XtraDB Cluster (PXC), Galera

High Availability & Replication: Clustering, failover strategies, replication topologies, ProxySQL, HAProxy, read/write splitting, distributed database design

Performance & Query Tuning: Indexing strategy, query optimization, resource contention resolution, deadlock and concurrency troubleshooting, caching (Redis, Memcached, Varnish, CloudFront)

Backup & Disaster Recovery: Percona XtraBackup, mydumper, AWS Snowball, Cron-based backup strategy, zero data-loss recovery planning

Cloud & Infrastructure: AWS (RDS, DynamoDB, Redshift, EC2, S3, CloudFront, Lambda), OpenStack, hybrid cloud architecture, Rackspace, UpCloud, Liquid Web, Nexcess

Monitoring & Incident Response: Nagios, ELK stack, Percona Monitoring & Management (PMM), Grafana, PagerDuty on-call, root-cause analysis, MTTR reduction

Big Data & Analytics: Hadoop, AWS EMR, HiveQL, Redshift, HDFS

Security & Compliance: PCI-DSS, OWASP best practices, firewall management, server hardening, SSL/TLS

Automation & Scripting: Bash, Python, PHP, Ansible, Terraform, Puppet, Docker, Kubernetes, GitLab CI/CD, WP-CLI

Web Servers & Hosting Control Panels: Apache, Nginx, PHP-FPM performance tuning, cPanel/WHM, Plesk, InterWorx, Virtualmin

Networking & DNS: TCP/IP diagnostics (MTR, traceroute), DNS administration, SSL/TLS troubleshooting

PROFESSIONAL EXPERIENCE

Database Administrator (DBA) & AWS Cloud Data Ops Engineer

Apr 2026 – Present

Upwork • Freelance • Remote (Las Vegas, NV)

- Provide freelance database administration, AWS cloud engineering, and full-stack e-commerce development for high-performance production systems where scalability, uptime, and reliability directly impact revenue.
- Design, implement, and optimize data architectures across SQL and NoSQL environments (MySQL, MariaDB, PostgreSQL, MongoDB, SQLite) plus AWS-managed services (RDS, DynamoDB, Redshift).
- Resolve high-CPU, locking, deadlock, and concurrency issues through query tuning and indexing strategy across production database systems.
- Design high-availability database architectures using replication, clustering, Percona XtraDB Cluster, Galera, and failover strategies to improve resilience and fault tolerance.
- Configure ProxySQL and HAProxy for load balancing, read/write splitting, and scalable database connectivity in production.
- Execute database migrations, replication strategies, and version upgrades with zero or minimal downtime using rollback-aware, production-safe deployment practices.

<https://upwork.com/freelancers/~016bcaceaa7f29db64>

Associate DBA / Technical Services Engineer

2016

Percona · Remote

- Provided production-level MySQL, MariaDB, Percona Server, and MongoDB support for enterprise clients across RDS, MySQL Master HA, and Percona XtraDB Cluster environments.
- Responded to critical incidents via PagerDuty on-call for customers including Fitbit, Vimeo, and Airbnb, resolving high-severity alerts and reducing MTTR.
- Diagnosed performance issues across thread counts, CPU utilization, memory, load averages, connections, and disk conditions to isolate root cause.
- Tuned database performance, resolved resource contention, and maintained high-availability topologies while supporting ProxySQL and Percona Monitoring & Management (PMM).
- Ensured backup continuity using Percona XtraBackup and mydumper, achieving zero data-loss incidents.
- Improved monitoring and alerting through Nagios threshold tuning and Ansible automation wrappers.

L3 Linux & Database Hosting Support Engineer

2021 – 2025

Liquid Web · Nexcess CloudSites · Remote

- Delivered L3 database troubleshooting and performance tuning for SMB and enterprise clients (including Kate Spade and GameCrazy), resolving complex issues across MySQL, MariaDB, PostgreSQL, and MongoDB in production LAMP/LEMP and OpenStack environments.
- Automated backend database operations and deployments across Galera, MongoDB, PostgreSQL, Redis, and Elasticsearch, maintaining consistent stability at scale.
- Managed MySQL performance, integrity, and security, combined with Cron-based backup strategy and disaster recovery planning, maintaining 24/7 uptime with 0% data loss.
- Tuned server and database performance using Redis, Varnish, Elasticsearch, Solr, and RabbitMQ, reducing page load times across production workloads.
- Maintained security compliance across database and CMS ecosystems aligned to PCI-DSS and OWASP best practices, sustaining 0% data breach incidents.
- Recognized in Liquid Web's Women in Technology feature for leadership in server and database performance tuning.

Technical Support Engineer (IaaS) — Database & Infrastructure

2019 – 2020

UpCloud · Remote

- Managed database environments including MySQL, MariaDB, Percona Server, and MongoDB, performing performance tuning, query optimization, replication management, and data integrity checks across high-availability production systems.
- Supported Linux and Windows IaaS platforms, contributing to 99.999% uptime through proactive administration and incident response.
- Performed network and database diagnostics (MTR, traceroute) correlating DNS, connectivity, and SSL/TLS negotiation with database performance to isolate upstream and firewall issues.
- Authored a technical tutorial on deploying single-node WordPress LEMP environments on CentOS 8, including database architecture and scalability guidance.
- Maintained 80–100% weekly customer satisfaction ratings through clear communication and effective database troubleshooting.

AWS Full Stack Developer — Database & Cloud Infrastructure

Jul 2018 – Nov 2018

National Specialties LLC · Contract · Hybrid (Saginaw, MI / Seattle–Tacoma–Lakewood, WA)

- Migrated 23+ domains and built ~50 S3 buckets, reducing cloud storage costs through lifecycle policies and storage tiering.
- Developed and tuned a WooCommerce platform on MySQL/RDS with Redis, Nginx, PHP-FPM, and Zend OpCache to improve database query performance and platform stability.
- Integrated distributor systems (SanMar, Rothco) via drop-shipping workflows and SOAP APIs to automate inventory and fulfillment data.
- Implemented backup/disaster recovery using AWS Snowball to protect production and design assets, maintaining 0% data loss.

AWS Magento E-Commerce Full Stack Developer

2015 – 2016

craftartedu.com · Contract · Remote (Tacoma, WA)

- Administered AWS environments and delivered database infrastructure optimization for improved performance and cost efficiency.
- Managed a hybrid Magento v1 platform's underlying database, integrated with a custom Java application across Linux and Windows.
- Prepared the Magento v1-to-v2 database and platform upgrade path, modernizing security and scalability.

- Maintained 100% uptime during database optimization and upgrade work, implementing automated backup and retention policies with zero data loss.

AWS WooCommerce/WordPress Full Stack Developer

2014 – 2016

SydneyKrey · Contract · Remote (Tacoma, WA)

- Administered RDS (MySQL/MariaDB) databases powering product catalogs, order data, and transactional records for a high-availability WooCommerce/WordPress platform on AWS.
- Configured Redis and Memcached for object/page caching and tuned Nginx/Apache with PHP-FPM to reduce database load under high-performance e-commerce traffic.
- Implemented Elastic Load Balancing and Auto Scaling for seasonal spikes and flash sales, sustaining 99.99% uptime.
- Implemented IAM roles, security groups, VPC segmentation, SSL/TLS, and daily backup strategy to secure customer and transaction data.

Linux Administrator / Database & Cloud Ops (RHCE)

2014 – 2016

Rackspace Technology · Full-time · Hybrid (San Antonio, TX)

- Managed MariaDB, MySQL, Percona XtraDB Cluster, and Galera clusters — replication, failover, backups, and query optimization for high availability across enterprise Linux environments.
- Administered Linux systems (RHEL 6–7, CentOS, Ubuntu) across LAMP/LEMP stacks supporting WordPress, Magento, Drupal, and Joomla database-backed applications.
- Applied DevOps practices with Docker, OpenStack, Ansible, Puppet, and HAProxy to deliver scalable, highly available database and hosting platforms meeting enterprise SLAs.
- Executed disaster recovery drills and backup verification across Rackspace Cloud, OpenStack, and dedicated environments.
- Monitored databases and applications using Nagios and the ELK stack, triaging alerts and resolving performance issues proactively.

Game Server Administrator & Developer — Early Database Experience

2005 – 2013

Private Ragnarok Online Servers · Freelance · Remote

- Managed MySQL databases supporting 300+ concurrent users, migrating from MyISAM to InnoDB for improved reliability and transactional integrity.
- Designed, hosted, and maintained private MMORPG servers, achieving 99.9% uptime after database and infrastructure improvements.
- Implemented caching, load balancing, and performance monitoring, improving database and server stability over time.

EDUCATION

Institute of AI & Technology (Udacity × Accenture)

MBA, AI Product Management (In Progress) | **March 2026 – Present**

Inaugural cohort with Accenture; ~60% complete; ~11.1% of MBA credits granted via RPL exemption for prior dual-enrollment coursework.

<https://www.forbes.com/sites/ravravaglia/2026/03/12/udacitys-new-mba-shows-the-anti-mba-market-is-splitting-in-two/>

University of the People

Bachelor of Science, Business (In Progress) | **2025 – 2026**

3.22 GPA, Honors List (117/120 credits); Computer Science/E-Commerce Developer, Programming & Database electives.

CERTIFICATIONS

- AWS Certified Cloud Practitioner — Active
- AWS Knowledge: Security Champion — Active
- AWS Certified Solutions Architect – Associate — Exp. Jan 2026
- Plesk Linux Expert (Obsidian) — Issued Apr 2025, Expires Apr 2027
- Plesk Obsidian Professional Certification — Issued Sep 2023, Expires Sep 2025 (Credential ID: OBS-2-PRO-EXAM)
- Cloud Tech Associate, Advanced Disaster Recovery — Credential ID: C240499
- cPanel Professional Certification (CPP) — Issued Oct 2023, Expires Sep 2025
- cPanel Certified Partner Accreditation (CPCP) — Issued Oct 2023, Expires Oct 2024
- Imunify360 Certification — Issued Oct 2023, Expires Oct 2024
- cPanel & WHM System Administrator I & II (CWSA-1, CWSA-2) — Issued Oct 2023, Expires Oct 2024
- WHM Administration Certification (CWA) — Issued Oct 2023, Expires Oct 2024

- MongoDB University M102 (DBAs) & M202 (Advanced Deployment & Operations) — Issued 2014/2015
- Certified Linux Administrator (LPIC-1) — Credential ID: LPI-101 997303855
- Red Hat Certified System Administrator (RHCSA) — Credential ID: 140-075-227
- Red Hat Certified Engineer (RHCE) — Credential ID: 140-075-227
